INTRODUCTION

This publication provides preliminary mission data, Greenwich Mean Time of passes, correlation of photographic coverage with WAC chart areas, coverage plots, and preliminary data for Mission 1116-2, dated 29 April-8 May 1972 (GMT).

Plot sheets are arranged by geographic areas as indicated by the index tabs. Coverage of the Eurasian land mass is divided into days to eliminate illegible overprinting.

Plots for the forward and aft cameras are portrayed as stereoscopic and/or monoscopic passes. Stereo passes will be shown with the forward-looking camera frame numbers inside the pass outline and the corresponding aft-looking camera frame numbers outside the pass outline. In the event of monoscopic coverage, only the frame numbers of the operative camera will appear. The relative location of photographs falling between the numbered frames may be approximated by interpolation.

All frames are indicated on the plot sheets, regardless of water coverage, total cloud cover, or a complete lack of imagery.

Refer to the Mission Coverage Statistics (MCS) entitled Target Coverage Summary, 1116-2, for additional information on Mission

## PRELIMINARY MISSION DATA

Mission Number: 1116-2

Launch Date/Time (GMT): 19 April 1972/2144

Photo Dates (GMT): 29 April 1972-8 May 1972

Recovery Date/Time (GMT): 8 May 1972/2223

Operational Photo Passes: 45

Operational Altitude Limits: 81-107 NM

Photo Scale Range: 1:249,144-1:325,512

Operational Ground Coverage (Fwd and Aft):

- a. Linear Nautical Miles 47,848
- b. Square Nautical Miles 6,220,240

Frames:

Operational

Fwd-Looking 2,991  
Aft-Looking 2,990

Operational Imagery Footage (Fwd and Aft): 16,940

Anomalies: The port horizon camera shutter failed to close in three instances:

25X1

In each case, the shutter closed during the next programmed operation two main frames later. This anomaly caused two main frames to be severely fogged during each failure.

Vehicle Attitude: Normal.

Image Quality: The image quality is good and appears to be similar to that of recent KH-4B missions. Many frames maintain edge sharpness at 100X magnification.

In each case the shutter closed during the next programmed operation, two main frames later. During each failure the two succeeding frames were severely fogged.

Vehicle Attitude: Normal.

Image Quality: The image quality is good and is similar to the first bucket.

Cloud Free Coverage: 80 percent of the mission is cloud free.
